The following controllers can be paired with the console and used with this software.

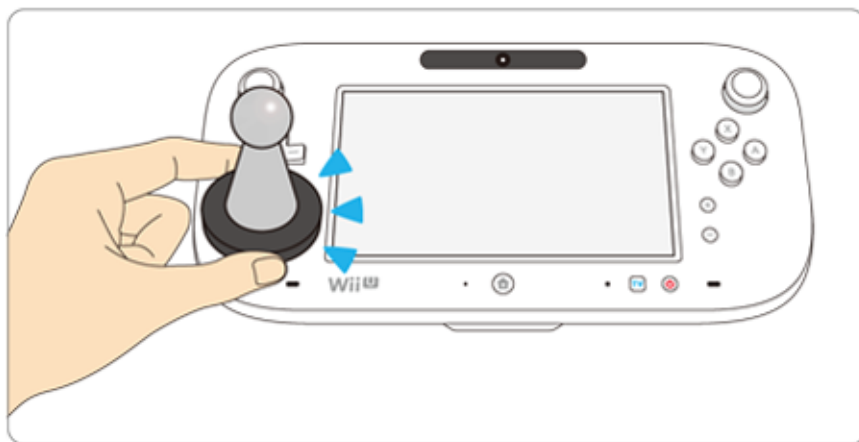

- ◆ Up to eight players can play together. To play multiplayer modes, each player needs a separate controller.
- ◆ Up to seven Wii Remotes and Wii U Pro Controllers can be paired with the console.
- ◆ The GameCube Controller Adapter for Wii U is required in order to use GameCube Controllers. Up to four GameCube Controllers can be connected to one adapter. Using two adapters at the same time, you can connect a maximum of eight GameCube Controllers at once. Controllers will be assigned to P1, P2 etc. in the order you connect them to the adapter and press (A).
- ◆ To use a Nintendo 3DS system as a controller, you must have a copy of Super Smash Bros.™ for Nintendo 3DS. Up to eight systems can be connected at once.  24
- ◆ Remember to make sure your controller has enough battery power. If it runs out of battery in the middle of an online match and you are unable to control your fighter, you may be restricted from online battle due to idling.
- ◆ Only one Wii U GamePad can be used with this software at a time.
- ◆ A Wii Remote™ Plus can be used instead of a Wii Remote.

This software supports **amiibo**. You can use compatible amiibo™ figures by touching them to the NFC touchpoint () on the Wii U GamePad.

Your amiibo aren't just for show. You can use NFC (near-field communication) to connect them to compatible software and play with them in the game. For more information, visit <http://amiibo.nintendo.eu/>.

- ◆ Each amiibo can only hold game data for one software title at a time. To save game data for another software title, you will need to delete the existing game data. You can do this by going to Wii U Menu ⇒  System Settings ⇒ amiibo Settings. If the “amiibo Settings” option doesn't appear, update your console by selecting System Update in  System Settings.
- ◆ An amiibo can be read by multiple compatible software titles.
- ◆ If the data on your amiibo becomes corrupted and cannot be restored, go to Wii U Menu ⇒  System Settings ⇒ amiibo Settings and reset the data. If the “amiibo Settings” option doesn't appear, update your console by selecting System Update in  System Settings.

If you use an amiibo, the character can appear in battles as an FP (figure player). FPs can stand against you as rivals or fight by your side as partners.

◆ You cannot control FPs.

Connecting to Super Smash Bros. for Nintendo 3DS

You can share amiibo data between both versions of Super Smash Bros. That means that an amiibo trained on Super Smash Bros. for Wii U can be used with the Nintendo 3DS version, and vice versa.

About amiibo

As amiibo battle, they will level up, slowly becoming stronger. They will learn based on how their opponents fight, and you can feed them equipment to give them new abilities, allowing every amiibo to grow into a unique fighter.

First-Time Setup

Go to "Games & More" → "amiibo", then touch your amiibo to the NFC touchpoint to register the owner's Mii and set the amiibo figure's nickname and character's appearance.

◆ You do not have to perform first-time setup if you've already used the amiibo in the Nintendo 3DS version.

Things You Can Do with amiibo

Make Them Fight as FPs

To make an amiibo appear in battle as an opponent or a partner, touch it to the NFC touchpoint while on the character selection screen in Smash mode.

- ◆ If you touch several amiibo to the NFC touchpoint, you can make your amiibo fight each other.

Customise Them

To customise an amiibo, go to "Games & More" → "amiibo", then touch it to the NFC touchpoint. You can feed it equipment to change its attack, defence and speed stats, and change its special moves.

- ◆ When you feed your amiibo equipment, keep an eye on the equipment's positive and negative stat values. They'll affect the growth of your amiibo.
